FULL MENU HOTROD® ROLLER GRILLS

Models: HR & HRS -31, -50, -45, -75 & -85 (BC, BD, BW, S, SBC, SBD, SBW)

INTENDED FOR OTHER THAN HOUSEHOLD USE

WARNING: California Residents Only. This product can expose you to chemicals including chromium which is known to the State of California to cause cancer and birth defects or other reproductive harm. For more information go to www.P65Warnings.ca.gov.

WARNING: FOR YOUR SAFETY: Do not store or use gasoline or other flammable vapors and liquids in the vicinity of this or any other appliance.

WARNING: Improper installation, operation, service or maintenance can cause property damage, injury or death. Read and understand these instructions thoroughly before positioning, installing, maintaining or servicing this equipment.

APW Wyott® cooking equipment has been engineered to provide you with year-round dependable service when used according to the instructions in this manual and standard commercial kitchen practices.

APW Wyott takes pride in the design and quality of our products. When used as intended and with proper care and maintenance, you will experience years of reliable operation from this equipment. To ensure best results, it is important that you read and follow the instructions in this manual carefully.

Installation and start-up should be performed by a qualified installer who thoroughly read, understands and follows these instructions.

If you have questions concerning the installation, operation, maintenance or service of this product, contact APW Wyott Foodservice Equipment Company's " Technical Service Department".

SAFETY PRECAUTIONS

Before installing and operating this equipment be sure everyone involved in its operation are fully trained and are aware of all precautions. Accidents and problems can result by a failure to follow fundamental rules and precautions.

The following words and symbols, found in this manual, alert you to hazards to the operator, service personnel or the equipment. The words are defined as follows:

	DANGER: This symbol warns of imminent hazard which will result in serious injury or death.	
---	---	---

	WARNING: This symbol refers to a potential hazard or unsafe practice, which could result in serious injury or death.	
---	---	---

	CAUTION: This symbol refers to a potential hazard or unsafe practice, which may result in minor or moderate injury or product or property damage.	
---	--	---

	NOTICE: This symbol refers to information that needs special attention or must be fully understood even though not dangerous.	
---	--	---

	CAUTION: These models are designed, built, and sold for commercial use. If these models are positioned so the general public can use the equipment make sure that cautions, warnings, and operating instructions are clearly posted near each unit so that anyone using the equipment will use it correctly and not injure themselves or harm the equipment.	
---	---	---

	WARNING: SHOCK HAZARD - Do not open any panels that require the use of tools.	
---	--	---

	WARNING: Improper installation, adjustment, alteration, service or maintenance can cause property damage, injury or death. Read the Installation, Operating and Maintenance Instructions thoroughly before installing or servicing this equipment.	
	NOTICE: The unit when installed, must be electrically grounded and comply with local codes, or in the absence of local codes, with the national electrical code ANSI/NFPA70- latest edition. Canadian installation must comply with CSA-STANDARD C.22.2 Number 0 M1982 General Requirements-Canadian Electrical Code Part II, 109-M1981- Commercial Cooking Appliances.	
	NOTICE: Local codes regarding installation vary greatly from one area to another. The National Fire Protection Association, Inc. states in its NFPA96 latest edition that local codes are “Authority Having Jurisdiction” when it comes to requirement for installation of equipment. Therefore, installation should comply with all local codes.	
	WARNING: Check the data plate on this unit before installation. Connect the unit only to the voltage and frequency listed on the data plate. Connect only to 1 or 3 phase as listed on the data plate.	
	WARNING: Disconnect device from electrical power supply and place a Tag Out-Lockout on the power plug, indicating that you are working on the circuit.	
	CAUTION: Maintenance & repair should be handled by a factory authorized agent. Before doing any maintenance or repair, contact APW Wyott.	
	NOTICE: Install according to the spacing requirements listed in the installation section of this manual. We strongly recommend having a competent professional install this equipment. A licensed electrician should make the electrical connections and connect power to the unit. Local codes should always be used when connecting these units to electrical power. In the absence of local codes, use the latest version of the National Electrical Code.	

Location of Data Plate

The data plate for the HotRod® Roller Grill is located on the back of the unit.

Immediately Inspect for Shipping Damage

All containers should be examined for damage before and during unloading. The freight carrier has assumed responsibility for its safe transit and delivery. If equipment is received damaged, either apparent or concealed, a claim must be made with the delivering carrier.

- A. Apparent damage or loss must be noted on the freight bill at the time of delivery. It must then be signed by the carrier representative (Driver). If this is not done, the carrier may refuse the claim. The carrier can supply the necessary forms.
- B. Concealed damage or loss if not apparent until after equipment is uncrated, a request for inspection must be made to the carrier within 15 days. The carrier should arrange an inspection. Be certain to hold all contents and packaging material.

Installation and start-up should be performed by a qualified installer who thoroughly read, understands and follows these instructions.

GENERAL INSTALLATION INSTRUCTIONS

This unit has been inspected and tested at the factory prior to shipment.

Unpack the unit and remove all packing materials. Place on a flat horizontal surface at the desired location.

WARNING: Check the data plate on this unit before installation. Connect the unit only to the voltage and frequency listed on the data plate. Connect only to 1 or 3 phase as listed on the data plate.

WARNING: IMPROPER GROUNDING COULD RESULT IN ELECTRICAL SHOCK! This appliance is equipped with a three prong (grounded) plug for your protection against electrical shock hazard and should be plugged directly into a properly grounded three prong receptacle. Do not cut or remove the grounding prong from this plug.

CAUTION: Do not use ordinary steel wool as any particles left on the surface will rust.

NEVER USE a wire brush, steel or abrasive scouring pads (except stainless), scraper, file or other steel tools. Surfaces which are marred collect dirt more rapidly and become more difficult to clean. Marring also increases the possibility of corrosive attack.

NEVER use any corrosive cleaner. Use only cleaners approved for stainless steel.

NEVER use cleaning solvents with a hydrocarbon base.

General Installation:

1. Always clean equipment thoroughly before first use. (See general cleaning instructions)
2. Check ratings label for your model designation and electrical ratings.
3. For best results, use stainless steel countertops.
4. Attach legs to unit.

General Operation Instructions:

1. Trained personnel should operate all food service equipment.
2. Do not allow your customers to come into contact with any surface labeled "CAUTION HOT".
3. Where applicable, never pour cold water into dry heated units.
4. Where applicable, do not cook, warm or hold food directly in liner/well pans. Always use steam table pans/inserts, etc.
5. NEVER hold food below 140° F.

General Cleaning Instructions:

1. Never clean any electrical unit by immersing it in water. Turn the unit off and allow it to cool before surface cleaning.
2. Always clean equipment thoroughly before first use. Clean unit daily. Except where noted on charts: use warm, soapy water. Mild cleansers and plastic scouring pads may be used to remove baked-on food and water scale on metal unit. NOTE: do not clean roller tubes with abrasive cleaners or scouring pads. Follow instructions on page 6.
3. Unplug electrical unit before cleaning or servicing. All service should be performed by an APW Wyott authorized service agency.

General Troubleshooting:

Always ask and check:

1. Is the unit connected to a live power source?
2. Check the circuit breaker.
3. Is power switch on and pilot light glowing?
4. Check the rating label. Are you operating unit on the proper voltage?

If the above checks out and you still have problems, call an APW Wyott authorized service agency.

INSTALLATION

Place the HOTROD® directly on a countertop or on a matching APW Wyott Bun Warmer or Bun Cabinet (available separately). Place the unit close to an AC outlet, of the correct voltage, to avoid undue strain on the power cord.

 **CAUTION:** To avoid equipment damage, make certain that the nameplate voltage is the same as the outlet voltage. 

If the plug is to be removed and replaced with a plug more suitable for your area, the color code for the power cable is:

Neutral (N) = White or Blue Live (L) = Black or Brown Safety Earth (E) = Green or Yellow/Green

After a suitable location has been chosen, wipe the rollers and the drip pan with a damp cloth. The unit is ready for use.

OPERATION

 **WARNING:** This unit is not intended to hold potentially hazardous foods such as un-cooked or un-preserved meats and sausages. 

There are three simple controls on the front of this unit: a switch, which controls the tube rotation, and two adjustable heat controls, which activates the two banks of heating elements in the roller tubes. Both heat controls have a light above them indicating either “Front” or “Back”. The front heat control activates the first 5 or 6 (depending on if your unit has 10 or 11 tubes). The back Control activates the remaining 5 tubes. Each bank of tubes can be heated independently of the others and at separate temperature settings. Variations in voltage and ventilation make experimenting the best guide to power level adjustment.

When a preferred adjustment is found, and it is desired to return consistently to the same spot on the controls, the controls can be fine-tuned by aligning with a mark on the knob. This adjustment does not require a service visit.

CLEANING

Daily Cleaning Instructions:

1. Heat the unit.
2. Using a moist cloth filled with crushed or flaked ice, wipe each tube. Wipe the tubes from each end to the center. This will keep as much of the loosened particles out of the bearings as possible. Extend the cloth as far as possible between the rollers.
3. With the heated rollers wiped with an ice filled cloth to loosen the particles, now, wipe clean with another cloth. Continue to wipe from the end of the rollers to the center. This will reduce the grease and partials getting into the bearings and drive mechanism. This will extend the life of the unit and extend the period between routine maintenance of the drive mechanism.

 **CAUTION:** NEVER use abrasive powders or pads; these cleaners may damage the roller finish. Also, the particles may get into the drive mechanism shortening the unit life. 

4. Remove the drip pan and wash it in hot, soapy water, then rinse.
5. If stains are still present, add a light detergent to the cloth and repeat.
6. Replace the pan and turn the unit off if the grill will not be immediately used.

Alternate Cleaning Method using optional 3M sponge (#21807305) and cleaning handle (#21807300):

1. Turn heat down to lower setting (i.e. "hold" temperature) and allow grill to cool.
2. If the grill has considerable grease build-up, wipe the excess grease from the rollers with a lint free towel or paper towel before using the soap and sponge.
3. Place sponge onto cleaning handle.
4. Immerse sponge in warm, soapy water.
5. Scrub rollers starting from the outside of the roller working your way to the center. Rinse sponge and re-wet with the soapy solution as needed.
6. Ensure that entire roller surface is cleaned.
7. Dry with a lint free towel or paper towel.

 **NOTE:** Cleanup will be faster if the product is specifically made for cooking on roller grills. Several meat packers now offer this product. For high-volume applications or for products that have a high sugar or fat content, the HOTROD® Roller Grill may require more frequent cleaning. For longer life of your HOTROD® Roller Grill, follow instructions for periodic cleaning throughout the day. 

Periodic Cleaning Throughout The Day:

1. For high-volume applications or for product that has a high fat content clean the rollers every 3-4 hours.
2. Clean by removing the product from the rollers and wiping with a damp cloth from outside end of the rollers to the center. Replace the product and continue cooking. There should be no need to turn off the heat when wiping down the rollers. But care should be taken not to bring hands into direct contact with the rollers as a burn could result.

 **NOTE:** This appliance shall not be cleaned with a water jet. 

SERVICE

Service work should be performed only by a qualified technician who is experienced in and knowledgeable with the operation of commercial gas, electric, steam cooking equipment. Contact the Authorized Service Agency for reliable service, dependable advice or other assistance and for genuine factory parts.

IF THE SUPPLY CORD IS DAMAGED, IT MUST BE REPLACED BY THE MANUFACTURER OR ITS SERVICE AGENT OR A SIMILARLY QUALIFIED PERSON IN ORDER TO AVOID A HAZARD.

LIMITED EQUIPMENT WARRANTY

APW warrants to the original purchaser of new APW's products to be free from defects in material or workmanship, under normal and proper use and maintenance service as specified by APW and upon proper installation and start-up in accordance with the instructions supplied with each APW unit. APW's obligation under this warranty is limited to a period of one [1] year from the date of original installation, or eighteen [18] months from original invoice date, whichever occurs first. Defects that occur as a result of normal use, within the time period and limitations defined in this warranty, will at APW's discretion have the parts replaced or repaired by APW or a APW's-authorized service agency.

THIS WARRANTY IS SUBJECT TO ALL LISTED CONDITIONS

Repairs performed under this warranty are to be performed by an APW authorized service agency. APW will not be responsible for charges incurred or service performed by non-authorized repair agencies. In all cases, the nearest APW-authorized service agency must be used. APW will be responsible for normal labor charges incurred in the repair or replacement of a warrantied product within 50 miles (80.5 km) of an authorized service agency. Time and expense charges for anything beyond that distance will be the responsibility of the owner. All labor will need to be performed during regular service hours. Any overtime premium will be charged to the owner. For all shipments outside the U.S.A. and Canada, please see the International Warranty for specific details. It is the responsibility of the owner to inspect and report any shipping damage claims, hidden or otherwise, promptly following delivery. No mileage or travel charges will be honored on any equipment that is deemed portable. In general, equipment with a cord and plug weighing less than 50 lb. (22.7 kg) is considered portable and should be taken or shipped to the closest authorized service agency, transportation prepaid.

CONTACT

Should you require any assistance regarding the operation or maintenance of any APW Manufacturing; phone or email our service department. In all correspondence provide the model number and serial number of the unit needing service; include the voltage or gas type.

Normal Business Hours: 8:00 a.m. to 4:30 p.m. Central

Telephone: 800-264-7827 Tech Service Option 2

Email: TechService@partstown.com

WARRANTY EXCLUSIONS

THE FOLLOWING WILL NOT BE COVERED UNDER WARRANTY.

APW's sole obligation under this warranty is limited to either repair or replacement parts, subject to the additional limitations detailed below. This warranty neither assumes nor authorizes any person to assume obligations other than those expressly covered by this warranty.

- Any product which has not been used, maintained, or installed in accordance with the directions published in the appropriate installation sheet and/or owner's manual, including incorrect gas or electrical connection. APW is not liable for any unit which has been mishandled, abused, misapplied, subjected to harsh chemicals, modified by unauthorized personnel, damaged by flood, fire, or other acts of nature [or God], or which have an altered or missing serial number.
- Installation, labor, and job checkouts, calibration of heat controls, air and gas burner/bypass/pilot adjustments, gas or electrical system checks, voltage and phase conversions, cleaning of equipment, or seasoning of griddle surface.
- Replacement of fuses or resetting of circuit breakers, safety controls, or reset buttons.
- Replacement of broken or damaged glass components, quartz heating elements, and light bulbs.
- Labor charges for all removable and consumable parts in gas charbroilers and hotplates, including but not limited to burners, grates, and radiants.
- Any labor charges incurred by delays, waiting time, or operating restrictions that hinder a service technician's ability to perform service.
- Replacement of parts that fail or are damaged due to normal wear or labor for replacement of parts that can be replaced during a daily cleaning routine, such as but not limited to silicone belts, PTFE non-stick sheets, control labels, knobs, bulbs, fuses, quartz heating elements, baskets, racks, and grease drawers.
- Any economic loss of business or profits.
- Non-OEM parts. Use of non-OEM parts without APW's approval will void the warranty.
- Units exceeding one [1] year from original installation date, or more than eighteen [18] months from original invoice date, whichever comes first.

ADDITIONAL WARRANTIES

- Specific/chain-specific equipment may have additional and/or extended warranties.

The foregoing warranty is in lieu of any and all other warranties expressed or implied and constitutes the entire warranty.
