# INSTRUCTIONS

## Step 1

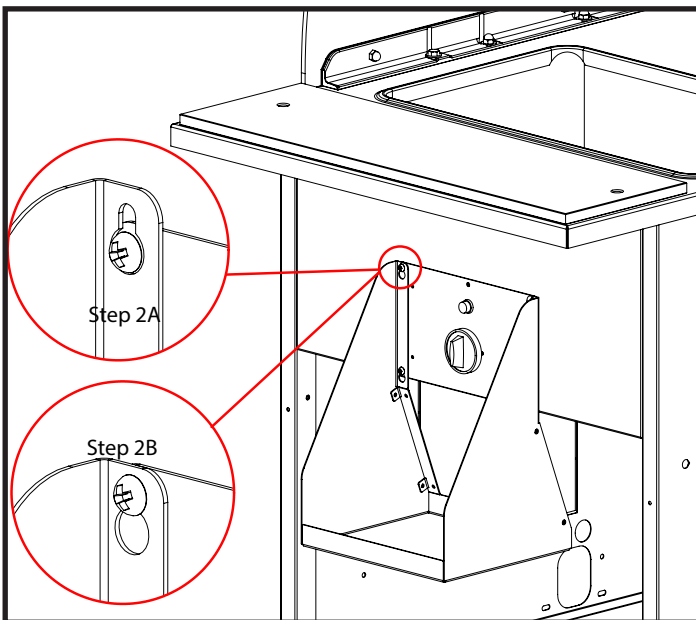

Locate the control panel on the hot food unit and begin loosening the four outer screws so there is approximately 1/8" gap between the head of the screw and the control panel.

**Do NOT completely loosen/remove the screws from the front panel.**

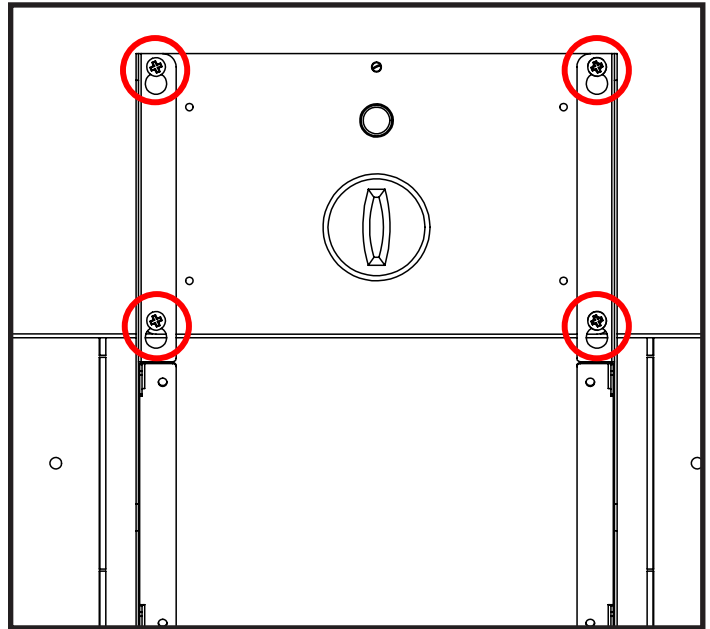

## Step 2

Slide the receipt shelf over the head of the screws from step one then slide it down so the slots on the shelf are resting against the shaft of the screw and the head of the screw is capturing the flange.

## Step 3

Once the shelf is in place tighten the four screws from step one so that everything is secure.

## Step 4

Installation complete. You are now ready to install your receipt printer.
