## **MODEL 12W WARMER**

**CAUTION:** This equipment is designed and sold for commercial use only by personnel trained and experienced in its operation and is not sold for consumer use in and around the home nor for use directly by the general public in food service locations. For equipment to be used by the general public, please contact the factory.

**VOLTAGE:** This warmer is equipped for operation on the voltage indicated on the nameplate. Do not connect to any other type of current or the machine will be seriously damaged.

## **GENERAL OPERATING INSTRUCTIONS**

This warmer will help build impulse sales when placed on either a front or back counter. Coupled with Star's Nacho Cheese Warmer, you have all the equipment necessary to get into the very profitable Nacho business! Care should be used when loading chips into this merchandiser/warmer to prevent breakage. A stainless steel chute is provided to help control breakage. Serving is accomplished by opening the bottom stainless steel door and scooping chips into an appropriate service container.

A warmer element is located under the stainless steel bottom of the unit that gently warms the chips. Turn "ON" the side mounted switch to activate this element and the lamp.

## **MAINTENANCE**

For retaining the high lustre on the stainless steel, use a non-abrasive standard stainless steel cleaner. Use a damp cloth and a warm mild soap to clean the glass, aluminum and plastic surfaces.
